Civil & Environmental Engineering Program ?

Application Process and Forms

All applications to the Civil & Environmental Engineering Graduate Programs must be initiated through the [Graduate School](#).

Please click on the [PDF](#), [Word document](#) (bottom of the page) for a detailed explanation of the application process (e.g. how to get to the online application site) and the list of required documents and how they must be submitted.

Students are encouraged to start the application process as early as possible and to have all required documents submitted ahead of the deadline in order to get an early admission decision. If a complete* application is not in by the deadline, such application may not be considered for the semester being applied to and students will have to reapply.

**A complete application means that all required documents have been submitted and received by UH, not just the online application*

All application materials must be submitted as instructed in the [PDF](#), [Word document](#); sending documents in any other way may considerably delay the processing of your application. Please do not send CDs, copies of research papers, portfolios, or theses- they will not be reviewed by the faculty.

It is the applicant's sole responsibility to ensure that all documents have been received by the stated deadline.

Application Deadlines

- Deadline for admission into all Civil graduate programs for the Fall semester is February 1st; Spring deadline is September 1st.
- Deadline for admission into all Environmental graduate programs for the Fall semester is February 1st; There is no admission for Spring.
